FOREWORD

In an era when the bass has grown dramatically in popularity, spanning from jazz and rock to R & B and funk, Jon's book is a great musical source for all bass players. It provides a comprehensive source of instruction for beginners and experienced players alike. In addition, it offers a full range of exercises as well as a complete discography of dozens of bass players for easy listening. ^

Funk/Fusion Bass is an enlightening and refreshing book. I recommend it highly.

Verdine White

Bassist with Earth, Wind & Fire

INTRODUCTION

The purpose of this book is to introduce today's bass player to the funk/fusion style of playing. Throughout the book, we'll keep in mind the role of the bass player, as I teach you what to do and what not to do. There are a lot of players with plenty of "chops" who have strong fingers and can play very fast—even loud! But who cares? Remember, you won't get called for gigs or recording sessions based on how fast you play, what kind of bass you have, how much money you have invested in equipment or the fact that your friend has a cousin who knows a guy in L.A. who is supposed to have "really good connections."

We bass players need to groove, plain and simple. Throughout this book, we'll concentrate on understanding your role as a bass player, how to do your job and what is expected from you on the gig or in the recording studio. Technique is important. Being able to read is important. Good equipment is important. A good work ethic is important. But no matter how much of any of those things you have, your popularity as a bassist will always come back to one thing: how well you groove.

In Chapter 1, we'll talk about proper practice techniques. You could be woodshedding the greatest music in the world (and perhaps there are those who will argue that case for *Funk/Fusion Bass!*), but if you're not approaching it properly, you might just be wasting your time. In this chapter, we'll take a look at what distinguishes "good" practicing from "bad." We'll discuss metronomes, drum machines, tape recorders, maintaining a music notebook and a few other points, with an eye toward improving your daily practice routine.

In Chapter 2, following a brief history of the evolution of the bass, we'll begin our slow, one-step-at-a-time approach with the fundamentals of the "fingers" technique (as opposed to the "thumb" technique). Since the fingers technique is the primary focus of this book and because it's crucial to master, we'll begin very slowly and build gradually. Remember, don't get too eager and jump to the end of the book without first becoming proficient with the earlier material. If the basic exercises weren't important, I wouldn't have taken the time to write them out, and I certainly wouldn't have included them in this book. Actually, I organized much of this material for my students to use for building technique, and I have been witness to some very impressive results. So take it to heart and practice slowly and carefully. You won't be doing yourself any favors if you get excited and jump straight to back of the book.

In Chapter 3, after becoming proficient with the scales and chromatic exercises, we'll begin to develop some basic funk/fusion patterns, utilizing octaves and string-crossing exercises. Though this chapter is more technical than musical, it is still, nonetheless, a very important step toward achieving our ultimate objective: mastering the groove.

In Chapter 4, we'll discuss several different style elements we'll need to incorporate into our playing to "jazz" it up just a bit (...ooh, the "J" word!). Included in this chapter are exercises for developing the hammer-on, the pull-off, the trill, the shake, the bend, etc. For those of you who have my first book, *Funk Bass* (that's all of you, isn't it?), first of all, thank you. Second of all, you'll notice that much of the format of *Funk/Fusion Bass* is similar to that of *Funk Bass*, including the chapter on style elements. However, all of the exercises in *Funk/Fusion Bass* are "new" and "different." Therefore, you're not exempt from practicing them.

Chapter 5, as in *Funk Bass*, deals with the most important element for every bass player. I'm referring to, of course (together now, class ...) "The Groove." I've said it before and I'll say it again: **Groove is everything, and everything must groove!** Don't ever forget it. Keep it in mind with every note in this book, as well as every note of your musical life!

This chapter includes an "encyclopedia" of grooves, in all twelve keys, designed to be played over and over again with your drum machine, or better yet, a real live drummer (provided, of course, your drummer can groove with a great time feel). Remember, 99% of your job is to lay down the groove with the drummer and establish the foundation for the rest of the band.

So what makes up the rest of your job as a bass player? Everything else you'll do is crammed into the remaining 1% (that ought to give you a little perspective on how important it is to groove in relation to "everything else"). Other things might include your personality, as it relates to your ability to do the

"schmoozing/networking" thing. Having the right equipment is very important, too. It never hurts to be a great reader. Being responsible and reliable isn't bad either. But none of this stuff will do you any good if you aren't able to groove.

My ability to help you with those "other" types of things is somewhat limited. I can help you, though, with your soloing. By now it should be clear that soloing, flashiness and showiness take a back seat to laying down the time and grooving. If it isn't, re-read this page as many times as necessary. If that still doesn't do the trick, get a hold of *Funk Bass* and study it inside out. If you still don't get the joke, ask yourself why nobody calls you for gigs!

Now that I've given my disclaimer, we can talk about Chapter 6. There is a time and place where it's okay to show off and "strut your stuff." Chapter 6 includes several different licks that can be incorporated into your solos to add that certain "pizazz." Have fun here, but remember to keep things in perspective. Your job, in almost every case, is to lay it down and *keep it simple*.

Throughout this book, we'll emphasize the importance of being able to play and read in all twelve keys. Guitar players and bass players are notorious for being able to "go crazy" in the key of "E" or "A," but completely "lunch out" when they have to accompany a singer whose song is in some "weird" key. Furthermore, you'll never know when you might be playing a show that contains sections in "C♭" or "A♯ minor" (it does happen from time to time) or when you might simply need to transpose a part into a different key.

Granted, "E" and "A," for example, offer some advantages to bass players because of the open strings. You should get to a point, however, where every key is just like every other key, and whatever key you happen to be playing in should not matter to you in the least. As I've stated before, there are no such things as "easy" keys and "hard" keys, only "familiar" keys and "unfamiliar" keys. Out of all of the compliments I have received about *Funk Bass*, one of the most recurring comments dealt with the fact that I included so many exercises and grooves in all twelve keys. I have maintained this approach in *Funk/Fusion Bass*, as you'll soon discover.

At the end of this book is a most extensive Discography, with dozens of bass players and examples for recommended listening. Hey, I can talk all day about playing the bass (and I often do!), but you need to hear for yourself. Imagine, if you will, someone describing, in words, what Gary Willis or Jeff Berlin sounded like! Would you be as impressed hearing someone talk about their playing as you would be after hearing it for yourself? A lot of time and effort went into selecting just the "right" recordings for the Discography. The players listed are the heroes of funk and funk/fusion bass. Check 'em out.

Be sure to move slowly and go through this book one step at a time, following all my instructions to the letter. By the time you reach the end of the book, your technique will have improved tremendously. You'll have the concepts of the groove and a great time feel indelibly etched in your mind (and in your playing!). You'll feel comfortable reading and playing in all twelve keys. You'll begin building your own library of grooves and licks and will be well on your way toward becoming your own independent funk/fusionist. You'll have an "arsenal" of great funk/fusion bassists to whom you can turn for hearing some of the finest bass work ever recorded.

Someone once said, "if you keep doing what you've been doing, you'll keep getting what you've been getting." If you're really ready to move on to the next plateau, the resources (including this book) are available. It all comes down to you and how hard you're willing to work at it. As with anything else, the more you put into it, the more you'll get out of it. Maybe you'll end up being the one in L.A. with the "really good connections!"

Good luck!

J. L.

CHAPTER 1

A Word On Practicing

"Practice doesn't make perfect. *Perfect* practice makes perfect."

—Vince Lombardi

These words, by the late, internationally renowned coach of the Green Bay Packers, are profoundly true. Whether you're talking about music or football, Mr. Lombardi's philosophy still applies. Even if you spend eight hours a day in the woodshed, you could be wasting your time if you don't have proper practice habits. In this chapter, we'll look at what distinguishes "good" practicing from "bad" practicing, and how to make the most efficient use of the hours you spend honing your bass skills.

"Did you say *bad* practicing? Does it really exist?"

Absolutely! Do you ever just "wander" around the bass, aimlessly, playing lick after lick? Do you often find yourself charging ahead through bass lines and solos that you already can play inside out? When you practice a part, do you think *only* of the bass, without considering the interplay between you and the other musicians (the drummer, for one?) Do you practice without a metronome or a drum machine? Or in front of the TV? If you answered yes to any of these questions, you may be found guilty of "bad practicing" and could be subject to eternal banishment from all that's hip, and forced to tap your toes on "one" and "three" for the rest of your life!

When you practice, it's serious business. Create an environment that's conducive to study. Keep distractions out of sight. Find a time when you won't be disturbed. Convince yourself that you're not hungry or thirsty, and get in the proper frame of mind.

My teacher used to have me keep a log of my practice sessions, which was a great help. Get a calendar, in which you'll record *nothing but* your practice schedules. Every day, take into account how many hours you're going to spend practicing and what you need to work on, then budget your time accordingly. Write down, for example, 30 minutes for scales and arpeggios, 20 minutes for sight-reading, etc. When the time allotted for each segment expires, move on to the next one, checking things off as you go. That way you're constantly chipping away at everything every day, and won't have to worry about three weeks going by without playing any Stu Hamm finger taps, or whatever else may be on your agenda. At the end of the week, take a look at your calendar and see how much practicing you're actually doing, versus how much you *think* you're doing. The results may surprise you.

"Time is of the essence." I don't know who first uttered those words, but they couldn't hold more truth for bassists. When you're practicing by yourself, always use a metronome, or, better yet, a drum machine. Remember: they're your friends! Concentrate not only on playing in time, but with a good time *feel*. A *great* time feel. So what if you know the right changes to 40,000 tunes? Who cares if you can play eighty-bizillion sixteenth notes a minute, or have the "baddest" setup this side of Osaka. **The most important job you have as a bass player is to groove with a great time feel.** You may think you're playing in time, but the metronome and drum machine will keep you "honest," so use them.

Another way to work on your time feel is to get together with a good drummer and groove. For hours. Don't just fool around, thought. Concentrate on "takin' care o' business." Oh, sure, you can still work on your solo chops, but spend most, if not all, of the time *on* the time. Pick several grooves that you want to work on, and practice them one at a time, over and over, without stopping. Be sure to play in all twelve keys, too. You may want to have your drummer friend program a few grooves into your drum machine, for you to practice with when you're by yourself.

So far, we've got three friends: a metronome, a drum machine and a real live warm body behind the drums. Let's add one more friend to our list: the tape recorder.

Back we go, one again, to the "honesty" category. You think you know what your playing sounds like? Try laying it down on tape and see (hear) if you're right. "Tape recorders don't lie." Recording your playing may reveal many flaws and bad habits of which you may not have been aware. It lets you really zero in on the attack and release of each note, as well as your sustain, intonation, *time feel* and overall sound. A tape recorder can be an invaluable practice tool.

Another great way to practice is to learn bass grooves from records, and then play along with them. Use your tape recorder to compare your line with Marcus Miller's line and see how it measures up. I'm not saying you should try to sound like Marcus, but if you think you're putting all the notes in the right places and it still isn't quite happening, try to pinpoint what it is about your playing that sounds different than the record. Keep in mind though, all the variables involved in creating music, like the player, strings, attack, electronics and effects, plus the fact that Marcus' bass is mixed with all the other sounds on the record. No matter how similar your style is to his, you won't sound like Marcus when you're practicing in your bedroom.

Try to get out to see great players perform as much as possible. In many cases, when you can see what they're doing, you'll understand certain bass concepts in a completely different way. If you can go down and talk to them, go ahead. Most people are friendly and they may be able to offer you some insights into bass playing that may encourage you. Live performances are great for incorporating inspiration into your practice sessions.

Finally, keep a music notebook of any new ideas that may hit you. If you hear something while practicing, write it down. Or it might be when you're in the car, or in the shower, or in bed or...well, you get the idea. This book came about, partially, because I had an idea and didn't want to forget it, so I wrote it down. Then I got another idea. And another. And I wrote those down. After several years of this process, my ideas eventually culminated into this book.

To get the full benefit from keeping a notebook, use it along with your friends, Mr. Drum Machine, Mr. Tape Recorder and your other pals. You may want to write down tempos or other information, too. Your ideas may even turn into tunes that make you rich. So give it a try. You may be surprised at how much creativity you have inside your brain that would have otherwise been lost forever.

Following these guidelines will improve your practicing tremendously. I recommend referring back to this chapter occasionally, when your practice sessions need a little "shot in the arm."

CHAPTER 2

Getting Started

EVOLUTION OF THE BASS

Ever wonder where we came from and how we got here? I'm speaking, not so much in a philosophical sense, but rather, a "bassic" one. How did it occur to Brian Bromberg and Steve Bailey to suddenly turn their left thumb into a "fifth finger" once they reached a certain register on the electric bass? What inspired Anthony Jackson and John Patitucci to expand the range of the bass so dramatically? And what in the world was going through Larry Graham's mind when he started whacking the bass with his thumb and snapping the strings like some sort of crazed harpist?

IN THE BEGINNING ...

The evolution of the bass is really quite fascinating. If you go back a few hundred years, you'll find that the bass was actually invented to double the cello line an octave lower because the cello, by itself, just didn't provide a sound that was deep enough or low enough to satisfy the composers or the conductors (see, even back then, they couldn't survive without us!). Ever hear an upright referred to as a "double bass?" Well, that name comes from the bass "doubling" the cello line. Other early versions of the bass included the violone, double bass viol and viola da gamba.

Our forefathers of bass had it pretty rough in those days. Early versions of the bass were big and awkward and quite clumsy. I wouldn't even hazard a guess as to how high the action was on those babies. Or what it must have felt like to pluck those thick gut strings. Or how it sounded with the bow! In the very beginning, anyone who could play quarter notes on those things was practically considered a virtuoso!

SUPPORTING THE ORCHESTRA

It didn't take long before our founding fathers (and mothers?) got together with the instrument makers and got most of the bugs worked out. By the time Haydn and Mozart came along, the bass must have reached a point where the bass players couldn't come up with any more excuses about the instrument, as is evidenced by some of the ferocious bass lines written by those composers.

Throughout the following centuries, orchestral parts for the instrument became increasingly difficult and complex, as composers wrote without fear. The double bass continued to maintain its supportive role throughout the Romantic period, from Beethoven to Wagner, right up through Brahms and Tchaikovsky.

SOLO, SO LOW!

Traditionally, only a limited amount of solo repertoire was written for the bass, especially when compared to the violin, the piano or any of the other more popular instruments of the day. Still, there is a handful of very good solo bass music from the eighteenth and nineteenth centuries you can find, if you look hard enough. There were even a few bass virtuosos (for real!) over the years, including Domenico Dragonetti, Giovanni Bottesini and a couple others. Among the composers from this period who wrote for the bass were Giovanni Cimador, Franz Keÿper, Karl Ditters von Dittersdorf, Johann Baptiste Vanhal and a few others.

By the early twentieth century, though the bass was still not rivaling the piano or violin as your "typical" solo instrument, an increasing number of composers wrote music specifically for the double

bass, including Serge Koussevitsky, Paul Hindemith and Reinhold Glière. Today, too, the literature for double bass continues to grow, through the works of Frank Proto, John Deak, François Rabbath and other noted composers. There is a steadily growing number of double bass virtuosos, too, including Gary Karr, Edgar Meyer, Barry Green, Thomas Martin, Klaus Trümper and several others.

JAZZ!

Jumping back to the early twentieth century, when the whole jazz movement was increasing in popularity, the bass, once again, found its niche. Around 1940, a man by the name of Jimmy Blanton began playing bass with the Duke Ellington orchestra. Blanton played things on the instrument no one else had ever imagined. He was a most innovative player, executing sophisticated eighth- and sixteenth-note horn-like runs and passages, actually making the bass sing as a melodic instrument! Other bass giants of the jazz era included Ray Brown, Milt Hinton, Oscar Pettiford, Paul Chambers, Charles Mingus, Percy Heath and many others.

Another powerful influence on jazz bass, a generation after Blanton, was Scott La Faro, best known for his work with pianist Bill Evans. Both Blanton and La Faro catapulted the bass to new heights with their virtuoso pizzicato (fingers) technique. It's almost as if they didn't know they were playing the bass, but rather a trumpet or a piano. People watched and listened, dumbfounded, and asked, "don't these guys know you can't do that on a bass?" Tragically, both men died at very young ages, though their influence on bass playing lives on.

THE EDISON INFLUENCE, PART I

No history of the bass would be truly complete without acknowledging the father of the electric bass, Leo Fender. Fender began tinkering with instruments and amplifiers in his radio shop during World War II. By 1951, he had created the first electric bass guitar, the Fender Precision Bass. Though reaction was mixed among bassists and purists of the day, generally, the music world took to the electric bass rather quickly. Before long, the Fender bass became a "charter member" of many early rock and blues groups. Today, though there are many makers of fine electric basses, the early Fenders are still considered classics.

By the 1960s, the popularity of the electric bass was seemingly unstoppable. That decade brought us the immortal James Jamerson, Jack Bruce, Tim Bogert, Larry Graham and several other extraordinary bass talents. And the music that James Brown was recording in those days was phenomenally influential in bass history, thanks largely to Bernard Odum, Charles "Sweet Charles" Sherrell, Bootsy Collins and the other JB bass men. Once the groundwork had been laid and the bass had been established as a force to be reckoned with that just wasn't going to go away, it became an integral part of just about every type of music, notably rock, pop, soul, heavy metal, disco (yeeecow!!! — the "D" word!) and other styles, too. The decade of funk, though, was definitely the 1970s.

THE FUNK THANG

Among the most notable and influential funk groups and artists during the '70s were: The Average White Band, The Brothers Johnson, Graham Central Station, George Clinton's Parliament Funkadelic, Kool & the Gang, Cameo, Con Funk Shun, Bohannon, Earth, Wind & Fire, Quincy Jones, Herbie Hancock, Tower of Power, The Gap Band, The Ohio Players, The O'Jays and several others. At the same time, during this "melting pot" in music history, there was a type of music that combined the driving beat of rock and roll with complex harmonies and other jazz and funk influences. This type of

music is usually referred to as jazz/rock fusion, or simply, fusion. Some of the early fusion groups and artists included: Weather Report, Return to Forever, The Brecker Brothers, Billy Cobham, Jean-Luc Ponty, The Crusaders, Mahavishnu, Tom Scott, Dave Grusin and others. And of course, we can't forget the bass players who contributed such a vital part to this music. Among the bass heroes of this decade were: Jerry Jemmott, Anthony Jackson, Chuck Rainey, Verdine White, Alphonso Johnson, Francis "Rocco" Prestia, Jaco Pastorius, Will Lee, Neil Jason, Stanley Clarke, Louis Johnson, Randy Jackson and so many others.

THE EDISON INFLUENCE, PART II

During the 1980s, the fusion movement continued to grow and develop. Many groups began integrating elements of funk and fusion, taking this music to the next level. With the advent and popularity of MIDI,* the new technology became more easily accessible to the "average" musician and electronic music was taken to new heights of sophistication, involving computers and highly influential software-based applications. What's more, now almost any instrument can sound just like any other instrument. Guitars can sound like drums or pianos, keyboards can sound like brass instruments, saxophones can sound like violins—you name it! Furthermore, with the popularity of samplers, an instrument can sound not only like another instrument, but like any sound that can be recorded.

Some of the more popular funk/fusion groups and artists of this period include: David Sanborn, Miles Davis,** Spyro Gyra, The Yellowjackets, Lee Ritenour, Tribal Tech, The Rippingtons, The Chick Corea Elektric Band, Vital Information and several others. By this time, the bass had developed into a mature instrument and had truly come into its own. Naturally, an increasing number of great bass players made their way onto the scene. This generation included: Jeff Berlin, Marcus Miller, Abraham Laboriel, Bunny Brunel, Victor Bailey, Lincoln Goines, Jamaaladeen Tacuma, Vail Johnson, Gary King, Mark King, Jonas Hellborg, Nathan East, Darryl Jones, Jimmy "Flin" Johnson, Tim Landers, John Patitucci, Gary Willis, Jeff Andrews, Gerald Veasley, Stuart Hamm, Brian Bromberg, Victor Wooten, Gary Grainger, Jimmy Haslip, Steve Bailey and loads of others.

* MIDI stands for Musical Instrument Digital Interface. It is the "language" that standardized communication between musical instruments and computers.

** It's difficult to decide where to include Miles Davis in any history of music, since he was extremely influential in every type of music with which he was involved, from the late 1940s until his death in 1991. Toward the end of the 1960s, Miles began experimenting with different combinations of acoustic music and electronics, employing the likes of Chick Corea, John McLaughlin, Keith Jarrett, Dave Holland and several other jazz notables. Though Miles tended to disappear and reappear several times throughout the next two decades, overall, he remained a strong influence on contemporary jazz.

WHAT NEXT?

Here in the '90s, nearly every player mentioned in the previous paragraph remains very active on today's music scene. The same can be said for most of the groups and artists, as well. Other funk and funk/fusion acts that became established in the '80s and are still going strong include Gerald Albright, Béla Fleck & the Flecktones, Brandon Fields and many others. Nowadays, many people are incorporating elements of rap and hip-hop into their music. Some are going for a more acoustic sound. Still others are pushing the limits of computers and electronics to new heights. With the technology today (not to mention tomorrow morning!), the practice of collaborating via computers and modems thousands of miles apart is seemingly no big deal by modern standards. Who knows what kind of things Miles would be into, or Jaco, if they were still alive? No one really knows what's next, but that's part of what makes it interesting.

By the way, can you answer the questions posed at the beginning of this chapter? Any guesses as to why Bailey and Bromberg use their left thumb as a "fifth finger" when they reach the upper register on the electric bass? The answer is simple. This technique, known as "thumb position," is the proper way to play in the upper register on an upright bass (if there is such a thing as "proper" any more). If you ever get a chance to see either one of these guys perform, this technique is quite a sight. You ought to see Brian use his dazzling two-handed tapping technique on the upright, too. Proper? Yeah, right!

And how did the six-string bass come about? Anybody who's ever heard Anthony Jackson or John Patitucci knows the answer to this question. As we've discussed, bass players have been able to accomplish quite a bit over the centuries, using only four strings. Then along come Anthony and John, who have so much more to say on the instrument that it had to be expanded in order for them to express themselves to the fullest. In listening to Anthony Jackson, you'll find that he takes care of business on the bass like nobody else. I read an interview with Anthony once where he stated he'd like to have a bass with the lowest string tuned all the way down to an "A" (a full octave lower than the "A" string on my bass and yours!). And when it comes to Patitucci, his love and respect for the saxophone players, namely, Cannonball Adderley, John Coltrane and Michael Brecker, is more than likely the inspiration for him to "blow" on the six string the way he does, covering the entire range of the instrument.

What about Larry Graham, the founder of the slapping technique? Larry, the story goes, developed the thumb slap/finger pop technique out of necessity because he was on a gig (in church with his mother) and they didn't have a drummer. Larry, therefore, made himself into a bassist and drummer combined, laying down the kick drum sound by slapping the bass with his right thumb, and supplying the back beat of the snare by popping the upper strings with his index finger (who needs a drummer, anyway? —just kidding). Naturally, stories always get better over the years and whatever really happened, no doubt became embellished. But, hey, it's a pretty good story. For more information on the slapping technique, refer to my first book, *Funk Bass*, published by Hal Leonard Corporation.

MASTERING THE TWO-FINGER TECHNIQUE

Though we don't know exactly where we're headed, we do know from whence we came, and that's a pretty good place to start. We don't have to go all the way back to pre-Bach times, but we can go back to the time when the electric bass was first perfected. Before we're ready to start making real music with the bass, we'll have to put some time and effort into technique, pure and simple. We'll start out very basic and eventually (gradually!) develop these examples into some very advanced exercises. Move at your own pace and don't rush through any of these drills. Remember that each set of exercises builds on the previous ones. You won't be doing yourself any favors by getting too eager and jumping to the back of the book, or even the back of the chapter.

Throughout this book, we will be focusing exclusively on the "fingers" technique (as opposed to the "thumb" technique). The thumb technique, you will recall from *Funk Bass*, involves "slapping" the bass with the thumb and "popping" the strings with the index (or sometimes middle) finger, creating a percussive sound and feel. The fingers technique involves plucking the strings with the index and middle fingers, creating a sound that is, generally, more fluid and flowing. Consider this information, though, to be just the basis for a starting point. Once you get solid with this technique and this concept, there is an unlimited number of variations waiting for you to take them on, if you want to.

Jeff Berlin, for example, does just fine with the "conventional" two-fingered technique. Jaco Pastorius was no slouch at it, himself! On the other hand, Steve Bailey, probably the most *unconventional* modern bass player, uses an intricate *three*-fingered technique (among other things in his seemingly bottomless bag of tricks) that's just astounding to watch (and hear!)* Brian Bromberg and Stuart Hamm, two very distinctive bass personalities, incorporate two-handed tapping as a major element of their playing. And then there's Victor Wooten, who loves to alternate between the thumb and fingers techniques, along with all kinds of other jaw-dropping displays of virtuosity. It should be apparent by now that there are no set rules (or rather, no set rules that can't be broken).

Correct left hand position

Correct sitting position

Correct standing position

Before breaking any rules, though, let's begin at the beginning. As someone once said, "a journey of a thousand miles begins with one step." You're going to take that first step today.

Allow me to assume that you've got your bass all set to go, you're tuned up, psyched up, pumped up and in the proper frame of mind (refer to Chapter 1 for additional inspiration, if necessary). Also, make sure your strap is set at a comfortable and practical length: not too long, so that you're unable to wrap your left** hand around the neck comfortably (sorry, heavy metal fans). Actually, I recommend wearing the bass as high as you can while remaining comfortable. Be sure your bass hangs at the same height on your body, regardless of whether you're sitting or standing (*see photos*).

* There are those who swear they've actually seen him demonstrate a *four*-finger technique — leave it to Bailey!

** The author does not wish to forget about or ignore left-handed players. It just wouldn't be politically correct! For the sake of simplicity, however, I will be referring to left-hand and right-hand positions from the perspective of the righty, since there are so many more righties than lefties. Thanks for understanding!

APPROACHING THE TWO-FINGER TECHNIQUE

Take a look at exercise 2.1. It may look simple enough at first glance. In order to build a solid foundation, though, we must make sure our playing is clean and accurate.

This exercise starts with the second finger on the right hand and alternates 2-1-2-1, etc. You'll need to make sure each note rings clearly. Make sure, also, that the notes sound flowing and connected, rather than "choked." Your fingers should not be totally straight nor too curled up, but rather, slightly rounded. Position your left hand so that each finger "hovers" over a different fret, always ready to press down on the string (see photos). Practice very slowly and deliberately, concentrating on precision.

STRING CROSSINGS

One area that requires, perhaps, the greatest amount of concentration is crossing from one string to another. The challenge here is maintaining the 2-1-2-1 alternating of the fingers. It is especially challenging when moving from the higher strings to the lower, where there is often a tendency to "drag" one finger across two strings. Granted, this is a valid technique, used by just about everyone. Furthermore, "raking" one finger across three or four strings (or more, if you've got them) can be very effective, as well. For the purposes of building rock-solid technique, however, I want you to discipline yourself to adhere to the two-finger alternating technique strictly and religiously. You can always drag or rake across the strings later. That's easy. What won't be easy, though, is the opposite (trust me, you'll never use it in your playing if you don't spend the time to learn it right). When you get into the really intricate sixteenth-note machine gun style, awesome, scare 'em to death, monster solo chops, you can use any technique you want. It'll be especially nice, though to have the solid two-finger technique under your belt or in your back pocket, so you can pull it out whenever you want it (or need it).

sequence

Incorrect right
hand position

You'll need to use extra diligence and concentration while going from the "G $\sharp$ " on the "E" string to the open "A" string, from the "C $\sharp$ " on the "A" string to the open "D" string and from the "F $\sharp$ " on the "D" string to the open "G" string. What's more, you'll need to be especially careful when coming back down from the open "G" string to the "F $\sharp$ " on the "D" string, from the open "D" string to the "C $\sharp$ " on the "A" string and from the open "A" string to the "G $\sharp$ " on the "E" string. Remember, throughout these exercises, the first finger to attack each "new" string is always the second finger. We'll get into more advanced string crossing studies in Chapter 3. In the meantime, be sure to practice slowly and deliberately.

CHROMATIC EXERCISES

Let's play something already! The word "chromatic" refers to playing all the notes, one fret at a time, without skipping any in between. We'll start slowly, playing each note four times. Set your metronome at 60 beats per minute — even slower if that's what it takes to get it perfect. Let's begin.

2.1

The bass line is written on a single staff in 4/4 time. It begins with a treble clef and a key signature of one sharp (F#). The melody consists of eighth and quarter notes. The notes are: G4, A4, B4, C5, D5, E5, F#5, G5, A5, B5, C6, D6, E6, F#6, G6, A6, B6, C7, D7, E7, F#7, G7, A7, B7, C8, D8, E8, F#8, G8, A8, B8, C9, D9, E9, F#9, G9, A9, B9, C10, D10, E10, F#10, G10, A10, B10, C11, D11, E11, F#11, G11, A11, B11, C12, D12, E12, F#12, G12, A12, B12, C13, D13, E13, F#13, G13, A13, B13, C14, D14, E14, F#14, G14, A14, B14, C15, D15, E15, F#15, G15, A15, B15, C16, D16, E16, F#16, G16, A16, B16, C17, D17, E17, F#17, G17, A17, B17, C18, D18, E18, F#18, G18, A18, B18, C19, D19, E19, F#19, G19, A19, B19, C20, D20, E20, F#20, G20, A20, B20, C21, D21, E21, F#21, G21, A21, B21, C22, D22, E22, F#22, G22, A22, B22, C23, D23, E23, F#23, G23, A23, B23, C24, D24, E24, F#24, G24, A24, B24, C25, D25, E25, F#25, G25, A25, B25, C26, D26, E26, F#26, G26, A26, B26, C27, D27, E27, F#27, G27, A27, B27, C28, D28, E28, F#28, G28, A28, B28, C29, D29, E29, F#29, G29, A29, B29, C30, D30, E30, F#30, G30, A30, B30, C31, D31, E31, F#31, G31, A31, B31, C32, D32, E32, F#32, G32, A32, B32, C33, D33, E33, F#33, G33, A33, B33, C34, D34, E34, F#34, G34, A34, B34, C35, D35, E35, F#35, G35, A35, B35, C36, D36, E36, F#36, G36, A36, B36, C37, D37, E37, F#37, G37, A37, B37, C38, D38, E38, F#38, G38, A38, B38, C39, D39, E39, F#39, G39, A39, B39, C40, D40, E40, F#40, G40, A40, B40, C41, D41, E41, F#41, G41, A41, B41, C42, D42, E42, F#42, G42, A42, B42, C43, D43, E43, F#43, G43, A43, B43, C44, D44, E44, F#44, G44, A44, B44, C45, D45, E45, F#45, G45, A45, B45, C46, D46, E46, F#46, G46, A46, B46, C47, D47, E47, F#47, G47, A47, B47, C48, D48, E48, F#48, G48, A48, B48, C49, D49, E49, F#49, G49, A49, B49, C50, D50, E50, F#50, G50, A50, B50, C51, D51, E51, F#51, G51, A51, B51, C52, D52, E52, F#52, G52, A52, B52, C53, D53, E53, F#53, G53, A53, B53, C54, D54, E54, F#54, G54, A54, B54, C55, D55, E55, F#55, G55, A55, B55, C56, D56, E56, F#56, G56, A56, B56, C57, D57, E57, F#57, G57, A57, B57, C58, D58, E58, F#58, G58, A58, B58, C59, D59, E59, F#59, G59, A59, B59, C60, D60, E60, F#60, G60, A60, B60, C61, D61, E61, F#61, G61, A61, B61, C62, D62, E62, F#62, G62, A62, B62, C63, D63, E63, F#63, G63, A63, B63, C64, D64, E64, F#64, G64, A64, B64, C65, D65, E65, F#65, G65, A65, B65, C66, D66, E66, F#66, G66, A66, B66, C67, D67, E67, F#67, G67, A67, B67, C68, D68, E68, F#68, G68, A68, B68, C69, D69, E69, F#69, G69, A69, B69, C70, D70, E70, F#70, G70, A70, B70, C71, D71, E71, F#71, G71, A71, B71, C72, D72, E72, F#72, G72, A72, B72, C73, D73, E73, F#73, G73, A73, B73, C74, D74, E74, F#74, G74, A74, B74, C75, D75, E75, F#75, G75, A75, B75, C76, D76, E76, F#76, G76, A76, B76, C77, D77, E77, F#77, G77, A77, B77, C78, D78, E78, F#78, G78, A78, B78, C79, D79, E79, F#79, G79, A79, B79, C80, D80, E80, F#80, G80, A80, B80, C81, D81, E81, F#81, G81, A81, B81, C82, D82, E82, F#82, G82, A82, B82, C83, D83, E83, F#83, G83, A83, B83, C84, D84, E84, F#84, G84, A84, B84, C85, D85, E85, F#85, G85, A85, B85, C86, D86, E86, F#86, G86, A86, B86, C87, D87, E87, F#87, G87, A87, B87, C88, D88, E88, F#88, G88, A88, B88, C89, D89, E89, F#89, G89, A89, B89, C90, D90, E90, F#90, G90, A90, B90, C91, D91, E91, F#91, G91, A91, B91, C92, D92, E92, F#92, G92, A92, B92, C93, D93, E93, F#93, G93, A93, B93, C94, D94, E94, F#94, G94, A94, B94, C95, D95, E95, F#95, G95, A95, B95, C96, D96, E96, F#96, G96, A96, B96, C97, D97, E97, F#97, G97, A97, B97, C98, D98, E98, F#98, G98, A98, B98, C99, D99, E99, F#99, G99, A99, B99, C100, D100, E100, F#100, G100, A100, B100, C101, D101, E101, F#101, G101, A101, B101, C102, D102, E102, F#102, G102, A102, B102, C103, D103, E103, F#103, G103, A103, B103, C104, D104, E104, F#104, G104, A104, B104, C105, D105, E105, F#105, G105, A105, B105, C106, D106, E106, F#106, G106, A106, B106, C107, D107, E107, F#107, G107, A107, B107, C108, D108, E108, F#108, G108, A108, B108, C109, D109, E109, F#109, G109, A109, B109, C110, D110, E110, F#110, G110, A110, B110, C111, D111, E111, F#111, G111, A111, B111, C112, D112, E112, F#112, G112, A112, B112, C113, D113, E113, F#113, G113, A113, B113, C114, D114, E114, F#114, G114, A114, B114, C115, D115, E115, F#115, G115, A115, B115, C116, D116, E116, F#116, G116, A116, B116, C117, D117, E117, F#117, G117, A117, B117, C118, D118, E118, F#118, G118, A118, B118, C119, D119, E119, F#119, G119, A119, B119, C120, D120, E120, F#120, G120, A120, B120, C121, D121, E121, F#121, G121, A121, B121, C122, D122, E122, F#122, G122, A122, B122, C123, D123, E123, F#123, G123, A123, B123, C124, D124, E124, F#124, G124, A124, B124, C125, D125, E125, F#125, G125, A125, B125, C126, D126, E126, F#126, G126, A126, B126, C127, D127, E127, F#127, G127, A127, B127, C128, D128, E128, F#128, G128, A128, B128, C129, D129, E129, F#129, G129, A129, B129, C130, D130, E130, F#130, G130, A130, B130, C131, D131, E131, F#131, G131, A131, B131, C132, D132, E132, F#132, G132, A132, B132, C133, D133, E133, F#133, G133, A133, B133, C134, D134, E134, F#134, G134, A134, B134, C135, D135, E135, F#135, G135, A135, B135, C13

Musical notation for the bass line of 'The Rose Tree'. The notation is on a single staff with a bass clef. The key signature has one sharp (F#). The melody consists of eighth notes. The notes are: G2, A2, B2, C3, D3, E3, F#3, G3, A3, B3, C4, D4, E4, F#4, G4, A4, B4, C5, D5, E5, F#5, G5, A5, B5, C6, D6, E6, F#6, G6, A6, B6, C7, D7, E7, F#7, G7, A7, B7, C8, D8, E8, F#8, G8, A8, B8, C9, D9, E9, F#9, G9, A9, B9, C10, D10, E10, F#10, G10, A10, B10, C11, D11, E11, F#11, G11, A11, B11, C12, D12, E12, F#12, G12, A12, B12, C13, D13, E13, F#13, G13, A13, B13, C14, D14, E14, F#14, G14, A14, B14, C15, D15, E15, F#15, G15, A15, B15, C16, D16, E16, F#16, G16, A16, B16, C17, D17, E17, F#17, G17, A17, B17, C18, D18, E18, F#18, G18, A18, B18, C19, D19, E19, F#19, G19, A19, B19, C20, D20, E20, F#20, G20, A20, B20, C21, D21, E21, F#21, G21, A21, B21, C22, D22, E22, F#22, G22, A22, B22, C23, D23, E23, F#23, G23, A23, B23, C24, D24, E24, F#24, G24, A24, B24, C25, D25, E25, F#25, G25, A25, B25, C26, D26, E26, F#26, G26, A26, B26, C27, D27, E27, F#27, G27, A27, B27, C28, D28, E28, F#28, G28, A28, B28, C29, D29, E29, F#29, G29, A29, B29, C30, D30, E30, F#30, G30, A30, B30, C31, D31, E31, F#31, G31, A31, B31, C32, D32, E32, F#32, G32, A32, B32, C33, D33, E33, F#33, G33, A33, B33, C34, D34, E34, F#34, G34, A34, B34, C35, D35, E35, F#35, G35, A35, B35, C36, D36, E36, F#36, G36, A36, B36, C37, D37, E37, F#37, G37, A37, B37, C38, D38, E38, F#38, G38, A38, B38, C39, D39, E39, F#39, G39, A39, B39, C40, D40, E40, F#40, G40, A40, B40, C41, D41, E41, F#41, G41, A41, B41, C42, D42, E42, F#42, G42, A42, B42, C43, D43, E43, F#43, G43, A43, B43, C44, D44, E44, F#44, G44, A44, B44, C45, D45, E45, F#45, G45, A45, B45, C46, D46, E46, F#46, G46, A46, B46, C47, D47, E47, F#47, G47, A47, B47, C48, D48, E48, F#48, G48, A48, B48, C49, D49, E49, F#49, G49, A49, B49, C50, D50, E50, F#50, G50, A50, B50, C51, D51, E51, F#51, G51, A51, B51, C52, D52, E52, F#52, G52, A52, B52, C53, D53, E53, F#53, G53, A53, B53, C54, D54, E54, F#54, G54, A54, B54, C55, D55, E55, F#55, G55, A55, B55, C56, D56, E56, F#56, G56, A56, B56, C57, D57, E57, F#57, G57, A57, B57, C58, D58, E58, F#58, G58, A58, B58, C59, D59, E59, F#59, G59, A59, B59, C60, D60, E60, F#60, G60, A60, B60, C61, D61, E61, F#61, G61, A61, B61, C62, D62, E62, F#62, G62, A62, B62, C63, D63, E63, F#63, G63, A63, B63, C64, D64, E64, F#64, G64, A64, B64, C65, D65, E65, F#65, G65, A65, B65, C66, D66, E66, F#66, G66, A66, B66, C67, D67, E67, F#67, G67, A67, B67, C68, D68, E68, F#68, G68, A68, B68, C69, D69, E69, F#69, G69, A69, B69, C70, D70, E70, F#70, G70, A70, B70, C71, D71, E71, F#71, G71, A71, B71, C72, D72, E72, F#72, G72, A72, B72, C73, D73, E73, F#73, G73, A73, B73, C74, D74, E74, F#74, G74, A74, B74, C75, D75, E75, F#75, G75, A75, B75, C76, D76, E76, F#76, G76, A76, B76, C77, D77, E77, F#77, G77, A77, B77, C78, D78, E78, F#78, G78, A78, B78, C79, D79, E79, F#79, G79, A79, B79, C80, D80, E80, F#80, G80, A80, B80, C81, D81, E81, F#81, G81, A81, B81, C82, D82, E82, F#82, G82, A82, B82, C83, D83, E83, F#83, G83, A83, B83, C84, D84, E84, F#84, G84, A84, B84, C85, D85, E85, F#85, G85, A85, B85, C86, D86, E86, F#86, G86, A86, B86, C87, D87, E87, F#87, G87, A87, B87, C88, D88, E88, F#88, G88, A88, B88, C89, D89, E89, F#89, G89, A89, B89, C90, D90, E90, F#90, G90, A90, B90, C91, D91, E91, F#91, G91, A91, B91, C92, D92, E92, F#92, G92, A92, B92, C93, D93, E93, F#93, G93, A93, B93, C94, D94, E94, F#94, G94, A94, B94, C95, D95, E95, F#95, G95, A95, B95, C96, D96, E96, F#96, G96, A96, B96, C97, D97, E97, F#97, G97, A97, B97, C98, D98, E98, F#98, G98, A98, B98, C99, D99, E99, F#99, G99, A99, B99, C100, D100, E100, F#100, G100, A100, B100, C101, D101, E101, F#101, G101, A101, B101, C102, D102, E102, F#102, G102, A102, B102, C103, D103, E103, F#103, G103, A103, B103, C104, D104, E104, F#104, G104, A104, B104, C105, D105, E105, F#105, G105, A105, B105, C106, D106, E106, F#106, G106, A106, B106, C107, D107, E107, F#107, G107, A107, B107, C108, D108, E108, F#108, G108, A108, B108, C109, D109, E109, F#109, G109, A109, B109, C110, D110, E110, F#110, G110, A110, B110, C111, D111, E111, F#111, G111, A111, B111, C112, D112, E112, F#112, G112, A112, B112, C113, D113, E113, F#113, G113, A113, B113, C114, D114, E114, F#114, G114, A114, B114, C115, D115, E115, F#115, G115, A115, B115, C116, D116, E116, F#116, G116, A116, B116, C117, D117, E117, F#117, G117, A117, B117, C118, D118, E118, F#118, G118, A118, B118, C119, D119, E119, F#119, G119, A119, B119, C120, D120, E120, F#120, G120, A120, B120, C121, D121, E121, F#121, G121, A121, B121, C122, D122, E122, F#122, G122, A122, B122, C123, D123, E123, F#123, G123, A123, B123, C124, D124, E124, F#124, G124, A124, B124, C125, D125, E125, F#125, G125, A125, B125, C126, D126, E126, F#126, G126, A126, B126, C127, D127, E127, F#127, G127, A127, B127, C128, D128, E128, F#128, G128, A128, B128, C129, D129, E129, F#129, G129, A129, B129, C130, D130, E130, F#130, G130, A130, B130, C131, D131, E131, F#131, G131, A131, B131, C132, D132, E132, F#132, G132, A132, B132, C133, D133, E133, F#133, G133, A133, B133, C134, D134, E134, F#134, G134, A134,

Handwritten musical notation for the bass line of 'The Rose Tree'. The notation is on a single staff with a bass clef. It consists of four measures, each containing a half note. The notes are G2, A2, B2, and C3. The key signature is one sharp (F#). The tempo/mood is marked 'Andante'. The lyrics 'The Rose Tree' are written below the staff.

Musical notation for the bass line of 'The Rose Tree'. The notation is on a single staff with a bass clef. It consists of five measures. The first measure has a '2' below it and the numbers '10-10-10-10' below the staff. The second measure has a '3' below it and the numbers '11-11-11-11' below the staff. The third measure has a '4' below it and the numbers '12-12-12-12' below the staff. The fourth measure has a '1' below it and the numbers '13-13-13-13' below the staff. The fifth measure has a '2' below it and the numbers '14-14-14-14' below the staff. The notes are represented by stems with flags, indicating a specific rhythmic pattern.

Continue this study with exercises 2.2 and 2.3. Pay special attention to the hand positions (both left and right). Keep the right-hand fingers slightly rounded. Keep the left hand positioned squarely over the frets in a one-finger-per-fret configuration. Don't let your fingers get bunched up. Shifting from one position to another is important, too. Focus on a smooth transition whereby the shift is inaudible. Strive for a smooth, fluid sound. Keep the tempo very slow, at first. Concentrate. Make sure your music sounds accurate and smooth. If you can't do it at 60, that's okay. Try it at 50, or even 40. If you can't play it slowly, you certainly can't play it fast. We're going to build a solid foundation. (Please re-read this paragraph several times now, and refer to it often.) Let's continue.

2.2

2.6

Exercise 2.6 is a bass clef piece in 2/4 time. It consists of four systems of music with corresponding fretboard diagrams below each staff.

- System 1:** The staff contains a sequence of eighth notes: C2, D2, E2, F#2, G2, A2, B2, C3, D3, E3, F#3, G3, A3, B3, C4. The fretboard diagram below shows the positions: 0, 1, 2, 3, 4, 0, 1, 2, 3, 4, 0, 1, 2, 3, 4, 0.
- System 2:** The staff contains a sequence of eighth notes: D3, E3, F#3, G3, A3, B3, C4, D4, E4, F#4, G4, A4, B4, C5, D5, E5, F#5, G5, A5, B5, C6. The fretboard diagram below shows the positions: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20.
- System 3:** The staff contains a sequence of eighth notes: D5, C5, B4, A4, G4, F#4, E4, D4, C4, B3, A3, G3, F#3, E3, D3, C3, B2, A2, G2, F#2, E2, D2, C2. The fretboard diagram below shows the positions: 20, 19, 18, 17, 16, 15, 14, 13, 12, 11, 10, 9, 8, 7, 6, 5. The first measure is marked *8va* and the second measure is marked *loco*.
- System 4:** The staff contains a sequence of eighth notes: D2, C2, B1, A1, G1, F#1, E1, D1, C1, B0, A0, G0, F#0, E0, D0, C0, B0, A0, G0, F#0, E0, D0, C0. The fretboard diagram below shows the positions: 4, 3, 2, 1, 0, 4, 3, 2, 1, 0, 4, 3, 2, 1, 0, 4, 3, 2, 1, 0.

2.7

Exercise 2.7 is a bass clef piece in 4/4 time. It consists of three systems of music with corresponding fretboard diagrams below each staff.

- System 1:** The staff contains a sequence of eighth notes: C2, D2, E2, F#2, G2, A2, B2, C3, D3, E3, F#3, G3, A3, B3, C4, D4, E4, F#4, G4, A4, B4, C5, D5, E5, F#5, G5, A5, B5, C6, D6, E6, F#6, G6, A6, B6, C7, D7, E7, F#7, G7, A7, B7, C8, D8, E8, F#8, G8, A8, B8, C9, D9, E9, F#9, G9, A9, B9, C10, D10, E10, F#10, G10, A10, B10, C11, D11, E11, F#11, G11, A11, B11, C12, D12, E12, F#12, G12, A12, B12, C13, D13, E13, F#13, G13, A13, B13, C14, D14, E14, F#14, G14, A14, B14, C15, D15, E15, F#15, G15, A15, B15, C16, D16, E16, F#16, G16, A16, B16, C17, D17, E17, F#17, G17, A17, B17, C18, D18, E18, F#18, G18, A18, B18, C19, D19, E19, F#19, G19, A19, B19, C20, D20, E20, F#20, G20, A20, B20, C21, D21, E21, F#21, G21, A21, B21, C22, D22, E22, F#22, G22, A22, B22, C23, D23, E23, F#23, G23, A23, B23, C24, D24, E24, F#24, G24, A24, B24, C25, D25, E25, F#25, G25, A25, B25, C26, D26, E26, F#26, G26, A26, B26, C27, D27, E27, F#27, G27, A27, B27, C28, D28, E28, F#28, G28, A28, B28, C29, D29, E29, F#29, G29, A29, B29, C30, D30, E30, F#30, G30, A30, B30, C31, D31, E31, F#31, G31, A31, B31, C32, D32, E32, F#32, G32, A32, B32, C33, D33, E33, F#33, G33, A33, B33, C34, D34, E34, F#34, G34, A34, B34, C35, D35, E35, F#35, G35, A35, B35, C36, D36, E36, F#36, G36, A36, B36, C37, D37, E37, F#37, G37, A37, B37, C38, D38, E38, F#38, G38, A38, B38, C39, D39, E39, F#39, G39, A39, B39, C40, D40, E40, F#40, G40, MAJOR SCALES AND ARPEGGIOS

If you want to develop your technique, as well as your musicality, you've got to know your scales and arpeggios. All of them. In the following exercises, I've written out **all** of the major scales, with the arpeggios. Pay careful attention to the fingerings. Your ability to play these scales is crucial. You must know them inside out. All of them. I've included the key signatures to improve your reading, as well. You've got the tablature if you need it, too. Start slowly. Make sure you get these scales firmly under your fingers. They're crucial.

Note: Obviously, there is more than one way to play any piece of music. With the sheer volume of studies presented here, I have provided you with quite a bit of variety. The fingerings I have included are, by no means, the only ones, or even the "best" ones. If you're new at playing scales and arpeggios, I strongly urge you to use the fingerings in this book. They do work very well. If later on, you come up with a better fingering, all the power to you! Or perhaps you are studying with an experienced teacher who wants you to do it his or her way. That's fine. Try it my way, too, though.

You'll notice, also, that when the notes are in the extreme upper register, sometimes I use the 8va symbol and sometimes I write the notes out. This is to get you used to reading more than one kind of notation. Also, there may be times when I'll have you play a note on one string when you'd much rather play it on an open string. I have a reason for everything, here. Playing open strings is easy. Sometimes, however, you may be playing at a slow tempo where an open string would take away all the expression and the feeling that you need to put into the music that can't be achieved with an open string. After you become an expert, you can assess each musical situation and give it whatever it needs. In the meantime, please play these exercises as written.

MAJOR SCALES IN THIRDS

Playing scales in thirds will improve your chops dramatically! It will also give you a better understanding of the music, in your mind and in your fingers. Adhering strictly to the 2-1-2-1 right-hand fingering will require some extra effort and concentration while playing in thirds. Make sure you practice these exercises carefully. I've included the arpeggios here, as well. It's a good habit to play the arpeggio immediately after each scale. Beginning with the F♯ scale (exercise 2.32), you may begin the arpeggio with either the first or second finger of the left hand. Let's continue.

2.30 E major scale (in thirds)

E major arpeggio

0 4 2 7 6 4 | 9 4 6 7 2 4 | 0

2.31 F major scale (in thirds)

1 5 3 6 5 3 6 5 | 3 7 5 8 7 8 5 7 | 5 8 7 10 8 7 10 9

7 10 9 12 10 7 9 10 | 7 8 10 7 8 5 7 8 | 5 7 8 5 7 3 5 6 | 3 5 6 3 5 1 3 0

F major arpeggio

1 5 3 8 7 5 | 10 5 7 8 3 5 | 1

2.32 F# major scale (in thirds)

2 6 4 7 6 4 7 6 | 4 8 6 9 8 6 9 8 | 6 9 8 11 9 8 11 10

8 11 10 13 11 8 10 11 | 8 9 11 8 9 6 8 9 | 6 8 9 6 8 4 6 7 | 4 6 7 4 6 2 4 1

F# major arpeggio

2 6 4 9 8 6 | 11 6 8 9 4 6 | 2

2.33 G♭ major scale (in thirds)

Two staves of musical notation for the G♭ major scale in thirds. The top staff shows the scale in 4/4 time, starting on G♭ and ascending in thirds. The bottom staff shows the scale in 4/4 time, starting on G♭ and ascending in thirds. The notation includes fingerings and a repeat sign at the end.

G♭ major arpeggio

Two staves of musical notation for the G♭ major arpeggio. The top staff shows the arpeggio in 3/4 time, starting on G♭ and ascending in thirds. The bottom staff shows the arpeggio in 3/4 time, starting on G♭ and ascending in thirds. The notation includes fingerings and a repeat sign at the end.

2.34 G major scale (in thirds)

Two staves of musical notation for the G major scale in thirds. The top staff shows the scale in 4/4 time, starting on G and ascending in thirds. The bottom staff shows the scale in 4/4 time, starting on G and ascending in thirds. The notation includes fingerings and a repeat sign at the end.

G major arpeggio

Two staves of musical notation for the G major arpeggio. The top staff shows the arpeggio in 3/4 time, starting on G and ascending in thirds. The bottom staff shows the arpeggio in 3/4 time, starting on G and ascending in thirds. The notation includes fingerings and a repeat sign at the end.

2.35 A♭ major scale (in thirds)

Two staves of musical notation for the A♭ major scale in thirds. The top staff shows the scale in 4/4 time, starting on A♭ and ascending in thirds. The bottom staff shows the scale in 4/4 time, starting on A♭ and ascending in thirds. The notation includes fingerings and a repeat sign at the end.

C♭ major arpeggio

7 11 9 14 13 11 16 11 13 14 9 11 7

2.40 C major scale (in thirds)

First system of musical notation for the C major scale in thirds. The top staff shows the scale in 4/4 time, starting on C2 and ascending to C4. The bottom staff shows the fret numbers for each note: 8, 12, 10, 13, 12, 10, 13, 12, 10, 14, 12, 15, 14, 12, 15, 14, 12, 15, 14, 17, 15, 14, 17, 16.

C major arpeggio

Arpeggiated version of the C major scale in thirds. The top staff shows the scale in 4/4 time, starting on C2 and ascending to C4. The bottom staff shows the fret numbers for each note: 8, 12, 10, 15, 14, 12, 17, 12, 14, 15, 10, 12, 8.

2.41 C# major scale (in thirds)

First system of musical notation for the C# major scale in thirds. The top staff shows the scale in 4/4 time, starting on C#2 and ascending to C#4. The bottom staff shows the fret numbers for each note: 9, 13, 11, 14, 13, 11, 13, 11, 15, 13, 16, 15, 13, 16, 15, 13, 16, 15, 18, 16, 15, 18, 17.

C# major arpeggio

Arpeggiated version of the C# major scale in thirds. The top staff shows the scale in 4/4 time, starting on C#2 and ascending to C#4. The bottom staff shows the fret numbers for each note: 9, 13, 11, 16, 15, 13, 18, 13, 15, 16, 11, 13, 9.

2.42 D# major scale (in thirds)

First system of musical notation for the D# major scale in thirds. The top staff shows the scale in 4/4 time, starting on D#2 and ascending to D#4. The bottom staff shows the fret numbers for each note: 9, 13, 11, 14, 13, 11, 13, 11, 15, 13, 16, 15, 13, 16, 15, 13, 16, 15, 18, 16, 15, 18, 17.

VARIATIONS OF MAJOR SCALES

Now let's try another variation. Practicing this exercise will give you tremendous facility in both hands and will help you build technique, strength and endurance. Once you become familiar with this pattern, *be sure to practice it in all twelve keys!* See if you can come up with some of your own fingerings that are logical and facilitate smooth shifts on the fingerboard. Or maybe you have a teacher that would like you to use a particular fingering.

In any case, don't just practice in "E" major. In fact, you might even want to use your music notebook to write this pattern out in all the keys (be sure to include F $\sharp$ and G $\flat$, B and C $\flat$ and C $\sharp$ and D $\flat$). It'll be great experience for you! I deliberately did not write them all out for you. Coming up with your own fingerings will help you learn them more effectively and remember them more easily (whether you actually write them out or not).

Be sure to practice in moderation. I'm giving you some pretty demanding stuff here. If you need to take a break, go ahead. Maybe you'd like to flip through the Discography for a while, or do some listening. When you're ready to go on, I'll be right here.

2.45 E major (variations)

The musical score consists of five systems, each with a staff of music and a line of fingerings. The key signature is E major (two sharps: F# and C#). The time signature is 4/4. The fingerings are as follows:

- System 1: 0 2 4 5 5 4 2 0 | 2 4 5 2 2 5 4 2 | 4 5 2 4 4 2 5 4 | 5 2 4 6 6 4 7 5
- System 2: 7 4 6 7 7 6 4 7 | 4 6 7 4 4 7 6 4 | 6 7 4 6 6 4 7 6 | 7 4 6 7 7 6 9 7
- System 3: 9 6 7 9 9 7 6 9 | 6 7 9 6 6 9 7 6 | 7 9 6 8 8 6 9 7 | 9 6 8 9 9 8 6 9
- System 4: 9 8 6 9 9 6 8 9 | 8 6 9 7 7 9 6 8 | 6 9 7 6 6 7 9 6 | 9 7 6 4 4 6 7 4
- System 5: 7 6 4 7 7 4 6 7 | 6 4 7 6 6 7 4 6 | 4 7 6 4 4 6 7 4 | 7 6 4 7 7 4 6 7

E major arpeggio

ADDITIONAL VARIATIONS OF MAJOR SCALES

The next set of exercises offers yet another variation. As before, *be sure to practice this variation in all twelve keys.*

Remember, there's nothing wrong with playing these exercises slowly. *Really* slowly. In fact, why don't you try setting the metronome at a slow tempo (pick a good one like maybe 60 or even 50), and play through each exercise once. Then increase the tempo (to, say, 64 or 68, whatever is appropriate) and play through it again. Now set the metronome back to the original slow tempo and play through it once again. Then set the metronome even higher, to, say, 72. Keep repeating this process, practicing the slow tempo every other time. Once you're satisfied, go to another key and repeat the entire process.

This is a good way to learn to play fast (and everybody wants to play fast!). Don't ever lose sight of the music, though. Playing fast just for the sake of playing fast is not going to impress anybody. Do it for the sake of the music! Concentrate on the 2-1-2-1 technique (don't cheat!). Be especially careful when crossing strings. Go!

2.46 E major (variations)

E major arpeggio

E major arpeggio

0 4 2 7 6 4 9 4 6 7 2 4 0 4 2 7 6 4 9 4 6 7 2 4 0

Throughout the course of these exercises, you'll also encounter different configurations of eighth and sixteenth notes, as well as some different time signatures. So in addition to building your technique, you'll be improving your reading, as well. The arpeggios are included here, as well. As before, beginning with the F# scale (exercise 2.49), you may begin the arpeggio with either the first or second finger of the left hand.

2.47 E major

E major arpeggio

The musical score for 'The Rose Tree' is presented in two systems. The first system consists of a single staff with a treble clef, a key signature of one sharp (F#), and a 3/4 time signature. The melody is written in a simple, folk-like style, featuring a series of eighth and quarter notes. The second system also consists of a single staff with a treble clef, a key signature of one sharp (F#), and a 3/4 time signature. The melody continues, featuring a series of eighth and quarter notes. The score is accompanied by a guitar part, which is indicated by a 'G' in a circle. The guitar part is written in a simple, folk-like style, featuring a series of eighth and quarter notes. The score is presented in a clear, legible format, with a key signature of one sharp (F#) and a 3/4 time signature.

2.51 G major

The musical score is for G major in 2/4 time. The bass line is written on a single staff with a treble clef. The melody consists of eighth notes and quarter notes, with triplets indicated by a '3' over the notes. The fretboard diagram shows the positions of the fingers for each note, with numbers 1-3 indicating the fret and the letter 'B' indicating the note. The fretboard is divided into four measures, corresponding to the measures of the melody.

Practicing major scales in triplets in thirds (whew!) will not only do wonders for your technique (both hands), but will greatly improve your rhythmic sense, as well. It forces you to *feel* the music in a different way. It also becomes very challenging to coordinate your fingers to adhere to the 2-1-2-1 rule, particularly while crossing strings. Start very slowly. And, of course, *be absolutely certain you practice these patterns in all keys* (but you already knew that!)

2.62 E major (variations)

fingering: 2

E major arpeggio

Let's do one final variation before we move on. This exercise is meant to be played fast, and is a lot of fun, too. Make sure you build up the tempo gradually, though. And you know I'm going to tell you to practice this pattern in all keys. It's crucial for your mastery of the entire instrument (besides, it's good for you!) See what kind of fingerings you can come up with. Have fun.

2.63 E major (variations)

First system of E major variations. The staff shows a bass clef with a key signature of three sharps (F#, C#, G#) and a 2/8 time signature. The melody consists of eighth-note triplets. The fretboard diagram below shows the following fret numbers: 0 2 4 2 4 5 | 4 5 5 2 4 | 2 4 6 4 6 7 | 6 7 4 7 4 6.

Second system of E major variations. The staff continues the eighth-note triplet melody. The fretboard diagram shows: 4 6 7 6 7 9 | 7 9 6 9 6 8 | 6 8 9 8 9 11 || 9 8 6 8 6 9.

Third system of E major variations. The staff continues the eighth-note triplet melody. The fretboard diagram shows: 6 9 7 9 7 6 | 7 6 4 6 4 7 | 4 7 6 7 6 4 | 6 4 2 4 2 5.

E major arpeggio

E major arpeggio exercise. The staff shows a bass clef with a key signature of three sharps (F#, C#, G#). The melody consists of eighth-note triplets. The fretboard diagram shows: 2 5 4 5 4 2 | 4 2 0 2 0 1 || 0 4 2 7 6 4 | 9 4 6 7 2 4 || 0.

The exercises in this chapter are invaluable for developing your technique. In fact, it's pretty hard not to build some awesome chops if you practice long and hard and diligently. You should commit most of these studies to memory. Make up some of your own, too. Keep in mind the concept of what we're trying to do: build a solid foundation for technique, rather than just memorizing a bunch of notes. These exercises are great for warming up, particularly after you haven't played in a while. Always start slowly.

Of course, the major scale is not the only scale in the world. We've got the minors, too, and all the modes. We've also got the diminished and augmented scales, altered scales, whole tone scales, not to mention all kinds of really exotic scales (check out John Coltrane and see how many scale varieties you can decipher). Try applying some of these concepts to other scales, too. And don't just play scales in thirds, but try them in fourths and fifths and other intervals. Why not try a diminished whole-tone scale in sevenths? Or a harmonic minor in octaves? Start from the top, instead of the bottom. Play the arpeggio first. Play one scale on the way up and a different one coming down. Be creative. Have fun. *What are you waiting for?!*

CHAPTER 3

Studies In String Crossings

Now that we've got both hands wide awake, all warmed up and generally feeling pretty strong, let's take our playing to the next level. After becoming proficient with scales and arpeggio studies, a logical step to take is to isolate musical passages that require the hands to jump from one string to another. Obviously, this action will involve both hands, though the hand that usually requires the most effort in mastering this technique is the right hand. The exercises in this chapter will help you develop and strengthen your string-crossing abilities.

Concentrate on keeping the music flowing cleanly, efficiently and evenly. Be careful, also, not to allow any extraneous noise, or "string ring." You will be more susceptible to this problem if your right hand is jumping over strings, so you'll have to find a hand position that will enable you to dampen the strings you don't want vibrating. It may take a little doing to get comfortable, but if too many unwanted vibrating strings become a regular "feature" of your sound, it could actually cost you gigs, especially in the recording studio.

All the exercises in this chapter involve variations of studies in octaves, one of the chief building blocks of funk/fusion bass. Therefore, rather than just playing the notes, start to concentrate on feeling the music and playing with a good time feel (a groove!). Keep in mind that bass players often are called upon to play octave figures over and over (and over!) again and again, without stopping, as all the "hot licks" soloists enjoy the limelight. That's just the nature of the bass, folks. Ninety-nine times out of a hundred, we are providing a supportive role to the rest of the band. Establishing that foundation, though, is what makes our job so crucial and so wonderful! In order to do our job right, we must be solid and right on the money, never ever losing the beat. We'll begin with the basic technique and gradually get more musical.

The 2-1-2-1 right-hand fingering rule still applies for all of these exercises, except 3.1 and 3.2. For these exercises (and these exercises only!), use 1-2-1-2. You can try them the other way if you want, but don't hurt yourself! Start slowly.

3.1

Exercise 3.1 consists of three musical staves, each showing an octave scale in 4/4 time. The first staff covers octaves 0-5, the second 6-9, and the third 10-14. Each staff has a top line with notes and a bottom line with fret numbers. The notes are: Staff 1: C2, D2, E2, F2, G2, A2, B2, C3; Staff 2: C3, D3, E3, F3, G3, A3, B3, C4; Staff 3: C4, D4, E4, F4, G4, A4, B4, C5. The fret numbers are: Staff 1: 0, 1, 2, 3, 4, 5; Staff 2: 6, 7, 8, 9; Staff 3: 10, 11, 12, 13, 14.

First system of musical notation. The staff shows a sequence of notes with a key signature of one flat (B-flat). The fretboard diagram below the staff indicates fingerings: 14-14-14-14, 13-13-13-13, 12-12-12-12, and 11-11-11-11.

Second system of musical notation. The staff shows a sequence of notes with a key signature of one flat (B-flat). The fretboard diagram below the staff indicates fingerings: 10-10-10-10, 9-9-9-9, 8-8-8-8, 7-7-7-7, and 6-6-6-6.

Third system of musical notation. The staff shows a sequence of notes with a key signature of one flat (B-flat). The fretboard diagram below the staff indicates fingerings: 5-5-5-5, 4-4-4-4, 3-3-3-3, 2-2-2-2, and 1-1-1-1.

Section 3.2. Fourth system of musical notation. The staff shows a sequence of notes with a key signature of one sharp (F-sharp). The fretboard diagram below the staff indicates fingerings: 2-2-2-2, 3-3-3-3, 4-4-4-4, 5-5-5-5, and 6-6-6-6.

Fifth system of musical notation. The staff shows a sequence of notes with a key signature of one sharp (F-sharp). The fretboard diagram below the staff indicates fingerings: 6-6-6-6, 7-7-7-7, 8-8-8-8, 9-9-9-9, and 10-10-10-10.

Sixth system of musical notation. The staff shows a sequence of notes with a key signature of one sharp (F-sharp). The fretboard diagram below the staff indicates fingerings: 10-10-10-10, 11-11-11-11, 12-12-12-12, 13-13-13-13, and 14-14-14-14.

First system of musical notation (Bass clef). The staff contains a sequence of eighth notes with a flat (b) indicating a key signature change. Below the staff are two rows of fret numbers: 14 14 14 14, 13 13 13 13, 12 12 12 12, 11 11 11 11, 10 10 10 10, 9 9 9 9.

Second system of musical notation (Bass clef). The staff continues the sequence of eighth notes with a flat (b). Below the staff are two rows of fret numbers: 10 10 10 10, 9 9 9 9, 8 8 8 8, 7 7 7 7, 6 6 6 6, 5 5 5 5, 4 4 4 4.

Third system of musical notation (Bass clef). The staff concludes with a double bar line. Below the staff are two rows of fret numbers: 5 5 5 5, 4 4 4 4, 3 3 3 3, 2 2 2 2, 1 1 1 1, 0 0 0 0, 0.

3.3

Fourth system of musical notation (Bass clef). The staff contains a sequence of eighth notes with a sharp (#) indicating a key signature change. Below the staff are two rows of fret numbers: 2 2 2 2, 3 3 3 3, 4 4 4 4, 5 5 5 5, 0 0 0 0, 1 1 1 1, 2 2 2 2, 3 3 3 3.

Fifth system of musical notation (Bass clef). The staff continues the sequence of eighth notes with a sharp (#). Below the staff are two rows of fret numbers: 6 6 6 6, 7 7 7 7, 8 8 8 8, 9 9 9 9, 4 4 4 4, 5 5 5 5, 6 6 6 6, 7 7 7 7.

Sixth system of musical notation (Bass clef). The staff continues the sequence of eighth notes with a sharp (#). Below the staff are two rows of fret numbers: 10 10 10 10, 11 11 11 11, 12 12 12 12, 13 13 13 13, 8 8 8 8, 9 9 9 9, 10 10 10 10, 11 11 11 11.

Seventh system of musical notation (Bass clef). The staff concludes with a double bar line. Below the staff are two rows of fret numbers: 14 14 14 14, 14 14 14 14, 13 13 13 13, 12 12 12 12, 12 12 12 12, 12 12 12 12, 11 11 11 11, 10 10 10 10.

Bass clef, key signature of one flat (B-flat). The staff contains a melodic line with eighth and sixteenth notes. Below the staff are two lines of fret numbers for a guitar accompaniment.

Staff 1: Melodic line with a B-flat. Fret numbers: 11 11 11 11, 10 10 10 10, 9 9 9 9, 8 8 8 8.

Staff 2: Fret numbers: 9 9 9 9, 8 8 8 8, 7 7 7 7, 6 6 6 6.

Bass clef, key signature of one flat (B-flat). The staff contains a melodic line with eighth and sixteenth notes.

Staff 1: Melodic line with a B-flat. Fret numbers: 7 7 7 7, 6 6 6 6, 5 5 5 5, 4 4 4 4.

Staff 2: Fret numbers: 5 5 5 5, 4 4 4 4, 3 3 3 3, 2 2 2 2.

Bass clef, key signature of one flat (B-flat). The staff contains a melodic line with eighth and sixteenth notes, ending with a double bar line.

Staff 1: Melodic line with a B-flat. Fret numbers: 3 3 3 3, 2 2 2 2, 1 1 1 1, 0 0 0 0.

Staff 2: Fret numbers: 3 3 3 3, 2 2 2 2, 1 1 1 1, 0 0 0 0.

3.4

Bass clef, key signature of one sharp (F-sharp). The staff contains a melodic line with eighth and sixteenth notes.

Staff 1: Melodic line with an F-sharp. Fret numbers: 2 2 2 2, 3 3 3 3, 4 4 4 4, 5 5 5 5.

Staff 2: Fret numbers: 0 0 0 0, 1 1 1 1, 2 2 2 2, 3 3 3 3.

Bass clef, key signature of one sharp (F-sharp). The staff contains a melodic line with eighth and sixteenth notes.

Staff 1: Melodic line with an F-sharp. Fret numbers: 6 6 6 6, 7 7 7 7, 8 8 8 8, 9 9 9 9.

Staff 2: Fret numbers: 4 4 4 4, 5 5 5 5, 6 6 6 6, 7 7 7 7.

Bass clef, key signature of one sharp (F-sharp). The staff contains a melodic line with eighth and sixteenth notes.

Staff 1: Melodic line with an F-sharp. Fret numbers: 10 10 10 10, 11 11 11 11, 12 12 12 12, 13 13 13 13.

Staff 2: Fret numbers: 8 8 8 8, 9 9 9 9, 10 10 10 10, 11 11 11 11.

Bass clef, key signature of one flat (B-flat). The staff contains a melodic line with eighth and sixteenth notes.

Staff 1: Melodic line with a B-flat. Fret numbers: 14 14 14 14, 14 14 14 14, 13 13 13 13, 12 12 12 12.

Staff 2: Fret numbers: 12 12 12 12, 12 12 12 12, 11 11 11 11, 10 10 10 10.

First system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 11 11 11 11 (left), 9 9 9 9 (right)
 Measure 2: 10 10 10 10 (left), 8 8 8 8 (right)
 Measure 3: 9 9 9 9 (left), 7 7 7 7 (right)
 Measure 4: 8 8 8 8 (left), 6 6 6 6 (right)

Second system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 7 7 7 7 (left), 5 5 5 5 (right)
 Measure 2: 6 6 6 6 (left), 4 4 4 4 (right)
 Measure 3: 5 5 5 5 (left), 3 3 3 3 (right)
 Measure 4: 4 4 4 4 (left), 2 2 2 2 (right)

Third system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 3 3 3 3 (left), 1 1 1 1 (right)
 Measure 2: 2 2 2 2 (left), 0 0 0 0 (right)
 Measure 3: 2 2 2 2 (left), 0 0 0 0 (right)
 Measure 4: 0 0 0 0 (left), 0 0 0 0 (right)

3.5

Fourth system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 2 2 (left), 0 0 (right)
 Measure 2: 2 2 (left), 0 0 (right)
 Measure 3: 3 3 (left), 1 1 (right)
 Measure 4: 3 3 (left), 1 1 (right)

Fifth system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 6 6 (left), 4 4 (right)
 Measure 2: 6 6 (left), 4 4 (right)
 Measure 3: 7 7 (left), 5 5 (right)
 Measure 4: 7 7 (left), 5 5 (right)

Sixth system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 10 10 (left), 8 8 (right)
 Measure 2: 10 10 (left), 8 8 (right)
 Measure 3: 11 11 (left), 9 9 (right)
 Measure 4: 11 11 (left), 9 9 (right)

Seventh system of musical notation (Bass clef, key signature of one flat). The staff contains a melodic line with eighth and sixteenth notes, and a fretboard diagram below it. The fretboard diagram shows fingerings for the left hand (top line) and right hand (bottom line) across four measures.

Measure 1: 14 14 (left), 12 12 (right)
 Measure 2: 14 14 (left), 12 12 (right)
 Measure 3: 14 14 (left), 12 12 (right)
 Measure 4: 14 14 (left), 12 12 (right)

First system of musical notation (Bass clef, key signature of one flat). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 11-11, 11-11, 10-10, 10-10, 9-9, 9-9, 8-8, 8-8.

Second system of musical notation (Bass clef, key signature of one flat). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 7-7, 7-7, 6-6, 6-6, 5-5, 5-5, 4-4, 4-4, 3-3, 3-3, 2-2, 2-2.

Third system of musical notation (Bass clef). The staff contains a sequence of eighth notes ending with a double bar line. The fretboard diagram below shows fingerings: 3-3, 3-3, 2-2, 2-2, 1-1, 1-1, 0-0, 0-0, 0.

3.6

Fourth system of musical notation (Bass clef, 4/4 time signature, key signature of two sharps). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 2-2, 2-2, 3-3, 3-3, 4-4, 4-4, 5-5, 5-5, 0-0, 0-0, 1-1, 1-1, 2-2, 2-2, 3-3, 3-3.

Fifth system of musical notation (Bass clef, 4/4 time signature, key signature of two sharps). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 6-6, 6-6, 7-7, 7-7, 8-8, 8-8, 9-9, 9-9, 4-4, 4-4, 5-5, 5-5, 6-6, 6-6, 7-7, 7-7.

Sixth system of musical notation (Bass clef, 4/4 time signature, key signature of two sharps). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 10-10, 10-10, 11-11, 11-11, 12-12, 12-12, 13-13, 13-13, 8-8, 8-8, 9-9, 9-9, 10-10, 10-10, 11-11, 11-11.

Seventh system of musical notation (Bass clef, key signature of one flat). The staff contains a sequence of eighth notes. The fretboard diagram below shows fingerings: 14-14, 14-14, 14-14, 14-14, 13-13, 13-13, 12-12, 12-12, 12-12, 12-12, 11-11, 11-11, 10-10, 10-10.

First system of musical notation. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 11 11, 11 11, 10 10, 10 10, 9 9, 9 9, 8 8, 8 8.

Second system of musical notation. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 7 7, 7 7, 6 6, 6 6, 5 5, 5 5, 4 4, 4 4.

Third system of musical notation. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 3 3, 3 3, 2 2, 2 2, 1 1, 1 1, 0 0, 0 0.

Fourth system of musical notation, labeled 3.7. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 2 2, 3 3, 4 4, 5 5, 6 6, 7 7, 8 8, 9 9.

Fifth system of musical notation. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 10 10, 11 11, 12 12, 13 13, 14 14, 13 13, 12 12, 11 11.

Sixth system of musical notation. The top staff is a bass clef with a key signature of one flat (B-flat). The bottom staff shows fret numbers for the left hand. The first measure contains two measures of music, and the second measure contains two measures of music.

Top staff: Bass clef, key signature of one flat (B-flat). The music consists of eighth notes and quarter notes, with a repeat sign at the end of the second measure.

Bottom staff: Fret numbers. The first measure contains two measures of music, and the second measure contains two measures of music.

Fret numbers: 10 10, 9 9, 8 8, 7 7, 6 6, 5 5, 4 4, 3 3.

3.8

3.9

First system of musical notation. The top staff is a bass clef staff with a key signature of one flat (B-flat). The bottom staff is a two-line fretboard diagram with fret numbers 12-12, 14-14, 13-13, 11-11, 10-10, 9-9, and 11-11.

Second system of musical notation. The top staff is a bass clef staff with a key signature of one flat (B-flat). The bottom staff is a two-line fretboard diagram with fret numbers 10-10, 8-8, 9-9, 7-7, 6-6, 5-5, and 7-7.

Third system of musical notation. The top staff is a bass clef staff with a key signature of one flat (B-flat). The bottom staff is a two-line fretboard diagram with fret numbers 6-6, 4-4, 5-5, 3-3, 2-2, and 4-4.

Fourth system of musical notation. The top staff is a bass clef staff with a key signature of one flat (B-flat). The bottom staff is a two-line fretboard diagram with fret numbers 3-3, 1-1, 2-2, 0-0, 2-2, 0-0, and 0.

CHAPTER 4

Style Elements

Before we get into some serious grooving, let's review some of the basic elements of style, which will make your music sound more interesting, as well as help you add personality to your playing. You're probably familiar with many of these techniques, but a good review never hurts. Besides, it will give you a chance to build upon what you may already know, and improve your overall ability.

The *Hammer-on*. A *hammer-on* produces a note by slamming a finger onto the fingerboard, as opposed to actually plucking the string. In most cases, a previous note has been struck and is still ringing on the same string, adding momentum to the hammer-on. However, it is also possible for a note to be produced by the hammer-on technique, itself, although this technique requires extra effort in the left-hand finger, thus making it more difficult. The *hammer-on* provides variety in your articulation, and also allows you to play faster by relieving the right hand of some of the work. Try these examples.

4.1

p

5 7 9 7 9 3 5 5 7

4.2

1 3 1 3 1

4.3

3 5 3 5 6 7 5 7 5 5 3 5 3 5 6 7 5 7 5

4.4

The exercise is written on two staves. The top staff is a bass staff with a treble clef, containing a melodic line with eighth and sixteenth notes. The bottom staff is a guitar staff with fret numbers: 7 9 9 9 9 9 6 7 7 4 6 6 2 4. The exercise is divided into two measures by a double bar line.

4.5

Exercise 4.5 consists of two staves. The top staff is in bass clef, 4/4 time, with a key signature of one flat. It contains two measures of eighth-note patterns. The bottom staff shows the fret numbers for the left hand: 5 5 3 5 3 5 1 2 3 3 1 2 3 3 1 2 3 1.

The Pull-off. A close relative (cousin?) of the *hammer-on*, the *pull-off* is another variation in articulation that will make your playing more interesting. A bit more difficult than the *hammer-on*, the *pull-off* is executed by “flicking” a left-hand finger *off* the string, in a downward motion. Before you pull, though, you must make sure you have a note pressed down on another fret ready to “take over.” The most common pair of left-hand fingers used in a pull-off is the “ring-to-index” combination, but any other pattern is possible. Practice these exercises.

4.6

Exercise 4.6 consists of two staves. The top staff is in bass clef, 4/4 time, with a key signature of one flat. It contains two measures of eighth-note patterns. The bottom staff shows the fret numbers for the left hand: 7 5 7 5 7 5 6 7 5 7 7 5 7 5 7 5 8.

4.7

Exercise 4.7 consists of two staves. The top staff is in bass clef, 4/4 time, with a key signature of one flat. It contains two measures of eighth-note patterns. The bottom staff shows the fret numbers for the left hand: 3 5 3 5 3 5 3 5 3 5 3 5 3 5 3 5 3 5.

4.8

Exercise 4.8 consists of two staves. The top staff is in bass clef, 4/4 time, with a key signature of one flat. It contains two measures of eighth-note patterns. The bottom staff shows the fret numbers for the left hand: 7 5 7 5 7 5 6 7 5 7 5 6 7 5 8 5.

4.9

4.10

The Slide. Another way to get around from one note to another on the fingerboard is simply to slide your finger from one fret to another without lifting it up. You'll have to push down a little harder to get a smooth transition, but you ought to get the feel of it pretty quickly. Keep in mind, now that we've got a solid foundation (remember Chapters 2 and 3?), we're going for variety, style and personality. Let it slide!

4.11

4.12

4.13

The Trill. The trill is simply a *hammer-on/pull-off* combination that keeps repeating itself, usually fast. You might find yourself using your first two fingers the most often, since they are the strongest, but often your third finger, or even your pinky, might be more appropriate. It all depends on the context of the musical passage you're encountering at the time. So don't limit your options. Practice these exercises with as many variations as you can. Your fingers will get stronger and you'll add one more element to your awesome arsenal of tricks. Here come the trill drills!

CHAPTER 5

Establishing a Groove

So what's it all about, anyway? Assuming you've been going through this book one step at a time, in order, following my instructions to the letter (if you haven't, first of all, shame on you, second of all, go back and do it right from the beginning), you've got the underlying concept of what we're trying to do, you have some new insights into how to practice, you know your scales and arpeggios inside and out (hopefully not just the major scales), you're really great at string crossings and you can hammer-on, pull-off, slide, trill, shake and bend like nobody's business! What do you say we take all this information and make some music out of it?

The examples in this chapter (notice how I didn't refer to them as "exercises") are intended to be played over and over again with your drum machine, or better yet, a real live drummer. Concentrate on locking in and laying down a solid foundation for the rest of the band. Remember, that's your job! When you chose to be a bass player, you committed your willingness (and, hopefully, your eagerness) to play repetitive figures over and over (and over) again, often with little or no variation. It's just part of the gig. But what a wonderful gig it is! Everyone else relies (heavily!) upon us, along with the drummer, to lay it down and establish the groove.

So as you lay it down, remember to let the music breathe, keep it simple and, of course, groove! Tempos have been deliberately omitted. Use the recorded supplement as a guide, but feel free to experiment with different tempos. As in *Funk Bass*, the bass is recorded on the right side and the drums on the left. That way you can isolate either channel and experiment with different methods of practicing. We'll be playing in all twelve keys, as well (I never said I was going to make this easy for you!). Trust me, though, someday you'll thank me. Practice hard and diligently. Good luck.

5.1 **2** N.C. (E7#9)

*indicates audio track number

The musical score for 'The Rose Tree' is presented in two systems. The first system contains the first two measures of the melody and the first two measures of the bass line. The second system contains the next two measures of the melody and the next two measures of the bass line. The melody is written in a treble clef with a key signature of one sharp (F#). The bass line is written in a bass clef. The melody consists of eighth and quarter notes, while the bass line consists of eighth and quarter notes. The piece ends with a double bar line and repeat dots.

5.2 **3** N.C. (Fm)

The musical notation for exercise 5.2 is as follows:

Measure 1: Bass line (Bb) has a half note Bb and a half note F. Melody (Bb) has a quarter note Bb, an eighth note A, a quarter note G, and a quarter note F.

Measure 2: Bass line (Bb) has a half note Bb and a half note F. Melody (Bb) has a quarter note E, an eighth note D, a quarter note C, and a quarter note B.

Measure 3: Bass line (Bb) has a half note Bb and a half note F. Melody (Bb) has a quarter note A, an eighth note G, a quarter note F, and a quarter note E.

Measure 4: Bass line (Bb) has a half note Bb and a half note F. Melody (Bb) has a quarter note D, an eighth note C, a quarter note B, and a quarter note A.

CHAPTER 6

Building a Vocabulary for Funk/Fusion Soloing

I was tempted to leave this chapter out of the book, fearing it might fall into the wrong hands or be misunderstood. As you all know very well by now, your job as a funk/fusion bassist is, along with the drummer, to lay down the musical foundation, thus supporting the rest of the band, and to groove with a great time feel (if you don't know that by this point, start the book over again!). There is a time and place for everything, including, soloing and even, yes, "showing off." Please be careful and only show off at the appropriate time and only when you are called upon to do so (which is, absolutely, the minority of the time). You must remember, too, that when your solo is over, it's over and it's time to get right back to the business at hand, which is (together, now . . .) laying down the groove.

Now that I've issued my disclaimer, absolving me from any guilt whatsoever, let's set the tone for the remainder of this chapter to be very positive. Following are some really cool licks that will enhance your playing and help highlight your creativity and your overall musical abilities in between laying down the grooves. Some of these licks get pretty intricate so start slowly and practice diligently. If you're uncertain about anything, check out the recording (check it out, anyway). Once you get these examples under your fingers and into your musical vocabulary, try to incorporate them into your playing. Strive here for understanding concepts and feels, rather than just memorizing a bunch of notes. Once you get to that point, you'll be able to make up your own licks and make them fit into your own music. Your solos should sound spontaneous, not memorized and rehearsed. That point will come after you've immersed yourself in this music long enough.

Try to keep these musical passages in their proper context. Keep in mind these are merely bite-size chunks of musical ideas that can be developed into solos, or inserted within your solos. A good solo is more than just a bunch of notes. A good solo tells a story. Any good improvisation book will discuss motivic development, phrase linking and other techniques that will help enable you to present your solos with a thematic approach, making them much more interesting than notes-for-notes, speed-for-speed and chops-for-chops sake.

Rather than give you a dissertation on funk/fusion bass improvisation, I am hoping to whet your appetite and give you some things to think about. Naturally, the best way to understand the musical concepts is to observe this style of music being performed (go to concerts and clubs) and to hear it being played properly (listen to the recordings in the Discography). For our purposes, I have taken these bite-size chunks and placed them in the context of (here we go again!) GROOVES!!! In that sense, I guess you're getting the best of both worlds. Be sure to listen to as many selections in the Discography as possible. Also, check out as much live music as you can. And, of course, keep working on your technique and play, play, play!

6.2  (cont'd) N.C. (G7) play 4 times

6.3 **77** (cont'd)
N.C.(G7)

The musical score for "Nero" by John Williams is presented in two staves. The top staff is a bass line in 4/4 time, featuring a key signature of one flat (B-flat) and a tempo marking of "Allegretto". The melody is written in a single line of bass clef notation. The bottom staff is a guitar line, also in 4/4 time, with fret numbers indicated below the notes. The guitar line includes a double bar line and a repeat sign at the end.

6.4 78 N.C.(Fm)

6.4 **78**

(C7) (Fm)

Musical notation for the bass line of "The Sound of Silence". The notation is written on a single staff with a key signature of one flat (Bb) and a common time signature (C). The melody consists of eighth and quarter notes, with some measures containing rests. The notation is divided into three measures by vertical bar lines. The first measure is labeled with a chord symbol (C7) above it. The second measure is labeled with a chord symbol (Fm) above it. The third measure is labeled with a chord symbol (Fm) above it. The notation includes various musical symbols such as eighth notes, quarter notes, rests, and bar lines.

Musical notation for the bass line of "The Sound of Silence". The key signature is B-flat major (two flats). The notation is written on a single staff. It begins with a triplet of eighth notes (B-flat, A-flat, G-flat) marked with a "3". This is followed by a series of eighth and sixteenth notes, including a quarter rest, and ends with a final chord. Above the staff, the chords (C7) and (Fm) are indicated. Below the staff, the fingerings 6, 8, 6, 8, 6, 8, 6, 8, 6 are written.

6.5 79 N.C.(C7#9)

The musical score for 'The Rose Tree' is presented in two systems. The first system consists of a single staff with a treble clef and a key signature of one flat (B-flat). The melody is written in a simple, folk-like style. The second system consists of two staves. The top staff continues the melody, and the bottom staff provides a harmonic accompaniment using a simplified notation system with numbers 1 through 5, indicating fingerings or specific notes. The piece concludes with a double bar line and repeat dots.

DISCOGRAPHY

You can certainly gain a great deal of benefit from this book by practicing the exercises, studying the grooves and using the recorded supplement as a guide. But why stop there? The best way to get a grasp of a musical concept is to immerse yourself in it. Listen to it as much as possible and try to imitate what you hear. Then listen some more. And then imitate some more.

Sometimes you'll want to analyze what you hear. Other times you may just want to let it all soak in without giving it any thought. The more variety you incorporate into your playing and listening, the more interesting you'll find the music (and the more interested you'll sound when you play).

Compare different players and their styles and start asking some questions. Why does Gary Willis sound different than Jeff Berlin? What is it about Anthony Jackson and Abe Laboriel that makes so many producers call them for so many recording sessions? How come we can spot Jaco's playing a mile away?

The following selections were chosen because of the way they showcase the groove, as well as some awesome soloing. I would like to emphasize that, naturally, all of the listings in the Discography of *Funk Bass* are certainly applicable here, too (in fact, many of them have even been repeated here because of their direct application to funk/fusion bass). All the slapping stuff is great for getting your musical ear entrenched in the concept of groove. The main distinction in *Funk/Fusion Bass* is that the emphasis is on the fingers technique, as opposed to thumb slapping. I certainly wouldn't want to take anything away from Marcus Miller, Larry Graham, Mark King or any of the other slapping heroes. I just wanted to place more emphasis on Jeff Berlin, Anthony Jackson, Jaco Pastorius, Francis "Rocco" Prestia and the other "fingers heroes."

These suggested recordings cover quite a wide array of fingerstyle funk/fusion bass. From the Bernard Odum/Bootsy Collins/Charles Sherrell idiom that helped popularize James Brown's soul style of funk ... to the fretless-oriented inimitable style of Jaco Pastorius ... to the rapid-fire machine-gun funk of Tower of Power ... to the pop-oriented Earth, Wind & Fire. Other players, like Gary Willis, Jimmy Haslip and Stuart Hamm have been included, primarily to highlight their soloing abilities (not that they can't groove, too, of course!). Naturally, I couldn't include every great bass player on every great recording of funk/fusion music. All of the players listed below are important and worthwhile. You don't have to run out and buy every one of their recordings. I do encourage you, though, to acquire a pretty diverse cross section of music until you decide to which styles you'd really like to devote your attention. In the meantime, listen closely and enjoy. It's all good.

ACKNOWLEDGMENTS

Thanks to everyone who helped me get this project off the ground. First, to the bass players, most of whom were in the midst of whirlwind touring schedules, who took the time to review my manuscript and put their "seals of approval" on *Funk/Fusion Bass*:

Verdine White: You just can't get more legendary than E.W.F! Your influence on bass players is profound. You're an inspiration to us all. Thanks so much.

Steve Bailey: It seems that every time I see you, you're involved in a zillion new projects (without giving up any of the old ones!). You are truly one of the most innovative and creative people I've ever known. Thanks. All the best.

Nathan East: Your time and your input are greatly appreciated. It's not every day I get a fax from Australia. Pretty neat! Thanks for everything.

Abraham Laboriel: What can I say? (What can anybody say?!) It's virtually impossible to turn on the radio or go to a movie without hearing your stunning musicianship on the bass. You're a class act. Thank you.

Francis "Rocco" Prestia: Every time I think I've got every T.O.P. disk, I manage to find another one! They're all great (and so are you!). Thanks, Rocco.

Victor Wooten: It's been an awfully long time since any bass player absolutely scared me to death with his playing (I was about seventeen...his name was *Stanley something or other*...). I still haven't quite figured out exactly what you're doing or how you're doing it, but keep on doing it. It's great! Thanks.

Seeing a project like this to fruition also takes recording sessions, groove sessions, photo sessions, proofreaders, vinyl junkies, computer geeks, friends, family and, most definitely, a first-rate publishing outfit. Thanks to:

- Martin Liebman of the famous *Martin Liebman Music* studios, Farmington Hills, Michigan. If there's anything I like better than doing studio work, it's doing those late night sessions with you (and the pizzas, and the subs, and the chips, and the candy...). Thanks, also, for your ridiculously impeccable proofreading chops and all your comments and suggestions (even though I didn't use any of them!... I'm kidding, I'm kidding). Yo, bro!
- Mike "Friedbaum" Friedman. Thanks for all the time you spent with me on your drum kit, helping me get all those grooves and licks just right...And thanks for your insights...And thank for your musicianship...And thanks for your friendship...And hello to all the people you're telling right now, "Look! Here's my name! See? See?!!!"
- The staff of the *Specs Howard School of Broadcast Arts, Inc.*, Southfield, Michigan. As day gigs go, I couldn't ask for a better one. By the way, I made...well...a few copies on the copy machine for "personal use." Thanks to Specs, Lisa and everyone else.
- Tom Profit. The abounding breadth of etymological erudition you possess pursuant to prose and rhetoric is most meritorious and estimable. Much beholden to you, man!
- Randy Z. You're an inexhaustible arsenal of always-fresh ideas and never-ending creativity. It's always a joy working with you. Thanks for all your time and help, Z-man!

- Dr. Jazz of *Dr. Jazz Operations*. Oak Park, Michigan. Well, Doc, thanks again for letting me browse through your seemingly endless library of LPs, CDs and all that other stuff you've got in your giant vault. The Discography in this book is significantly "beefed up," thanks to you. Call me any time you need a favor (except to help you move). Cheers!
- Murray Goldenberg of *Goldenberg Photography*, Southfield, Michigan. You do great work, Murr! You can hardly see any of my gray hairs. (Let's keep it our secret!) Thanks.
- Rey Sanchez. Though we don't live near each other any more, don't really see each other very often, haven't talked in a while (hey, man, give me a call!), you'll always be the one who got me into the book writing business. *Muchas gracias, amigo!*
- Dale Titus, bassist extraordinaire and writer par excellence (not to mention, all-around good guy). You always turn my "How's it going, Dale" into a "Hey, Jon! How can I help you?" and "Have you tried this one?" and "Have you called that one?" and "What else can I do for you?" You're a rare one. Dale and a good one. Thanks.
- Mike "Szechuan" and Jeff "Sushi" Green. Just a couple of good-ol' boys who help keep Southern California's reputation in tact! Same time next year?
- John Cerullo, Jeff Schroedl, Karen Waldkirch and *everyone* at Hal Leonard Corporation. I couldn't be more proud to be associated with such a fine publishing company. Thank you all!

Special thanks to my son, Josh. You have a way of making me laugh at just about everything (and we sure know the opposite it true, too, don't we?). Keep grooving, boy!

The success of this book is to be shared by all the people mentioned here. Thank you all very, very much. Let's do another one!

NOTATION LEGEND

Guitar Music can be notated three different ways on a musical staff: in tablature, and in rhythm slashes

RHYTHM SLASHES are written above the staff. Strum chords in the rhythm indicated. Use the chord diagrams found at the top of the first page of the transcription for the appropriate chord voicings. Round noteheads indicate single notes.

THE MUSICAL STAFF shows pitches and rhythms and is divided by bar lines into measures. Pitches are named after the first seven letters of the alphabet:

TABLATURE graphically represents the guitar fingerboard. Each horizontal line represents a string and each number represents a fret.

Notes

Strings

4th string, 2nd fret

1st & 2nd strings open, played together

open D chord

D A D E G open str

HALF-STEP BEND: Strike the note and bend up 1/2 step

BEND AND RELEASE: Strike the note and bend up as indicated, then release back to the original note. Only the first note is struck.

HAMMER-ON: Strike the first (lower) note with one finger, then sound the higher note (on the same string) with another finger by fretting it without picking.

TREBLE: Very rapidly alternate between the notes indicated by continuously hammering on and pulling off.

PICK SCRAPER: The edge of the pick is rubbed down (or up) the string, producing a scratchy sound.

TREMOLO PICKING: The note is picked as rapidly and continuously as possible.

WHOLE-STEP BEND: Strike the note and bend up one step

PRE-BEND: Bend the note as indicated, then strike it.

PULL-OFF: Place both fingers on the notes to be sounded. Strike the first note and without picking, pull the finger off to sound the second (lower) note.

TAPPING: Hammer ("tap") the fret indicated with the pick hand index or middle finger and pull off to the note fretted by the fret hand.

MUFFLED STRINGS: A percussive sound is produced by laying the fret hand across the string(s) without depressing, and striking them with the pick hand.

VIBRATO BAR DIVE AND RETURN: The pitch of the note or chord is dropped a specified number of steps (in rhythm), then returned to the original pitch.

GRACE NOTE BEND: Strike the note and bend up as indicated. The first note does not take up any time.

VIBRATO: The string is vibrated by rapidly bending and releasing the note with the fretting hand.

LEGATO SLIDE: Strike the first note and then slide the same fret hand finger up or down to the second note. The second note is not struck.

NATURAL HARMONIC: Strike the note while the fret hand lightly touches the string directly over the fret indicated.

PALM MUTING: The note is partially muted by the pick hand lightly touching the string(s) just before the bridge.

VIBRATO BAR SCOOP: Depress the bar just before striking the note, then quickly release the bar.

SLIGHT (MICROTONE) BEND: Strike the note and bend up 1/4 step.

WIDE VIBRATO: The pitch is varied to a greater degree by vibrating with the fretting hand.

SHIFT SLIDE: Same as legato slide, except the second note is struck.

PINCH HARMONIC: The note is fretted normally and a harmonic is produced by adding the edge of the thumb or the tip of the index finger of the pick hand to the normal pick attack.

RAKE: Drag the pick across the strings and hand with a single motion.

VIBRATO BAR DIP: Strike the note and then immediately drop a specified number of steps, then release back to the original pitch.

ABOUT THE AUTHOR

Jon Liebman holds a Bachelor of Music degree in Jazz Studies and Contemporary Media from Wayne State University in Detroit, and a Master of Music degree in Studio Music and Jazz from the University of Miami in Coral Gables, Florida. He has performed extensively throughout the world, playing electric and acoustic bass for everything from jazz gigs and club dates to national television shows and full-scale concerts at Madison Square Garden. He has also played in the pit orchestras of many Broadway shows, including *Ain't Misbehavin'*, *Into the Woods*, *Dreamgirls*, *Les Misérables* and *Phantom of the Opera*.

Jon has toured with jazz greats Cleo Laine and Buddy De Franco, and has played bass for The Fifth Dimension, The Coasters, The Drifters, The Platters, The Chiffons, Billy Eckstine, Eartha Kitt, José Feliciano, Julio Iglesias and many others. He has also recorded numerous records, soundtracks, films and industrial shows, including several projects for Ford, General Motors and the NBA. Jon has also been a finalist in the jazz division of the International Double Bass Competition.

As a writer, Jon has been commissioned countless times to write arrangements for musical ensembles of all types and sizes. Two of his big-band arrangements have been performed on *The Tonight Show* and *The Late Show*. He has also worked as a music proofreader and copyist. In addition to *Funk/Fusion Bass*, Jon is the author of *Funk Bass* and *Stuart Hamm: The Bass Book*, both published by Hal Leonard Corporation.

Jon has spent time in California, as well, having been very active in the Los Angeles music scene as a performer and writer. Currently, Jon is the Director of the Specs Howard School of Broadcast Arts, Inc., in Southfield, Michigan.

ENDORSEMENTS

***"Funk/Fusion Bass* is an enlightening and refreshing book. I recommend it highly."**

Verdine White
Bassist with Earth, Wind & Fire

"A cornucopia of bass stuff! History, technique, musicality, groove...Guaranteed to 'fill the holes' in your playing!"

Steve Bailey
Bassist with The Rippingtons, David Benoit, Larry Carlton

***"Funk/Fusion Bass* by Jon Liebman is a great spectrum of information. Easily understood and simply done. I really loved the emphasis on groove and foundation (that's our job!). Definitely worth picking up."**

Francis "Rocco" Prestia
Bassist with Tower of Power

"It's not every day you find a book that addresses the most practical needs of the modern-day bassist. This is one of the most comprehensive publications dealing with the study of bass guitar on the market today. As serious bassists, we have a responsibility to stay on top (and bottom) of the development of our concept and technical skills. Therefore, I highly recommend this book. Enjoy!"

Nathan East
Bassist with Fourplay, Phil Collins, Eric Clapton

"There's a lot of good information in this book. Thanks, Jon, for your knowledge."

Victor Wooten
Bassist with Béla Fleck & the Flecktones

"The examples contained in this book are inspiring and above all, very enjoyable. I found myself completely lost and full of creativity with these ideas. I invite you to try and enjoy, too."

Abraham Laboriel
L.A. studio legend
